PROFILE

I'm a full-stack developer with deep experience in building web, mobile, and fintech solutions. I've led end-to-end product development driving architecture, implementation, and team coordination across diverse projects. I'm passionate about leveraging modern technologies to build scalable, high-performance applications that deliver real business value. I thrive in dynamic environments where innovation, and impact are key.

WORK EXPERIENCE

Transfolio, Gossart

Sep 2023 - Feb 2025

Full Stack Engineer & Project Manager

- Led end-to-end project management, ensuring timely delivery and client satisfaction.
- Developed an internal management dashboard for planning, leave tracking, order management, and AI-driven analytics (React.js, Node.js, Prisma).
- Built an e-commerce interface for shipment requests and order processing (Next.js).
- Integrated third-party systems to streamline business operations.
- Implemented and maintained a DevOps workflow using AWS.

S Com System

Nov 2022 - Jul 2023

Front-End Engineer & Project Manager

- Designed and developed a solution for IFC shrinkage calculations, ensuring accuracy and efficiency in data processing.
- Led the collaborative development of a React.js dashboard, working closely with the backend team to deliver a seamless and responsive user experience.
- Ensured alignment with client requirements by implementing requested features while maintaining performance, scalability, and adherence to UI/UX best practices.

Lepadd Startup.

Jul 2020 - Aug 2022

Full Stack Engineer & Mobile Developer

- Developed a cross-platform iOS/Android mobile application for the logistics sector using Flutter, enabling real-time delivery tracking through a RESTful API built with Node.js and a connected database.
- Designed and implemented a React.js dashboard that seamlessly integrates with the mobile tracking application, providing customers with a user-friendly interface for monitoring deliveries.
- Contributed to the development of a Transport Management System (TMS) in React.js as part of a collaborative team, ensuring compliance with UX/UI guidelines and the project's graphic charter.

EDUCATION

Bachelor of Engineering Science

Sep 2019

Highschool | [Espace Scolaire Condorcet](#) | Saint-Quentin France

Master of Computer Science

Oct 2024

[EPITECH European institute of Technology](#) | Lille, France
